LAURA ASHLEY

- 102 built-in embroidery designs including 30 exclusive Laura Ashley designs
- 260mm x160mm embroidery area
- Large sewing area
- Hundreds of stitch combinations
- Up to 1,000 stitches per minute
- Includes circular sewing attachment and bobbin work kit.

For all your sewing and embroidery needs

The Laura Ashley Innov-is 2200 has been designed with impressive features to delight both sewers and embroiderers.

Enjoy creating beautiful fashion and home decor projects with an extensive range of built-in stitches and Laura Ashley designed embroidery patterns. Combined with a clear LCD touch screen and simple controls, the Innov-is 2200 is the ideal machine to inspire your creativity.

Large embroidery area

The Innov-is 2200 has a large, 260mm x 160mm embroidery area, so you can create even bigger and more intricate designs. Its flexible workspace lets you create elaborate embroidery on larger projects, giving you extra convenience, without the need to re-hoop.

Clear, user-friendly backlit LCD touch screen

Now you can create sophisticated layouts with ease. Simply use the touch screen panel to edit your pattern. Create mirror images with the embroidery edit feature, rotate, enlarge, reduce, space characters, or change colours to suit your project needs.

Extensive choice of built-in designs

It's never been easier to start your own project. Brother's Innov-is 2200 comes with hundreds of built-in designs including monogramming font styles. Simply select your favourites and combine them with other stitches to create your own unique style, with 30 Laura Ashley embroidery patterns, 72 built-in embroidery designs and 8 font styles.

Fast, accurate embroidery

The Innov-is 2200 has a high maximum embroidery speed of 800 stitches per minute, so you can create large areas of complicated embroidery in a short period of time. Its slide-on mechanism allows you to quickly attach and remove the hoop whilst its automatic thread trimmer instantly cuts both top and bottom threads, saving you time.

Features and functions

Compatible manufacturer thread

In addition to the Brother thread chart, the Innov-is 2200 recognises threads from four manufacturers. When your pattern asks for a particular colour thread, just select the name of your manufacturer's thread from the information displayed.

Speed control customised for zigzag width (in sewing mode)

- Slide control adjusts speed from slow to fast
- Can be programmed to alter stitch width

Automatic threading system

Deluxe system automatically threads the needle.

Large embroidery area 260mm x 160mm (in embroidery mode)

More space for even bigger designs.

7-point feed dog (in sewing mode)

Contains extra teeth for smoother feeding, helping to create superior stitch quality.

Presser foot lever button

Lifts the presser foot up for you.

Trimmer button

Automatically cuts the top and bottom threads.

Needle position button

Raises or lowers the needle.

Reverse/reinforcement button

Automatically sews 4 reinforcement stitches. Sews straight and reverse zigzag stitches at low speed.

LCD touch-screen

- 240 x 320dpi resolution
- Built-in tutorials
- Built-in sewing references
- Embroidery editing
- Customised settings
- Available in 13 languages

Memory card slot

Instantly transfers embroidery patterns from memory card to your machine.

Free arm

Free arm conversion for awkward items such as collars and cuffs.

Knee lift (in sewing mode)

Free up your hands by using your knee to lift the presser foot up, ideal for working on large projects such as quilts.

Select the best stitch every time with the Innov-is 2200

With hundreds of built-in stitch combinations, including a range of utility stitches from blind hems to complex decorative patterns, the Innov-is 2200 helps you select the right stitch for every application. Includes 12 styles of automatic buttonhole, 239 decorative stitches and alphabet characters.

Large workspace and the freedom to move

The Innov-is 2200 has an extra-large 210mm x 112mm sewing bed, so you can manipulate larger projects with ease. Use the ergonomically designed knee lift to automatically raise the presser foot and leave your hands free to work the fabric.

The Innov-is 2200 is supplied with creative accessories to enhance your projects.

Use the bobbin work kit to create reverse 'upside down' sewing with speciality threads that don't fit through the eye of the needle.

Easy automatic needle threading

The Innov-is 2200 has a deluxe automatic needle threading system, so you can effortlessly thread up the machine and needle.

Smooth, multi-directional feed

The 7-point feed enables all fabrics to feed smoothly and efficiently. Because it has a multi-functional mechanism, you can sew in a straight line, stitch in 8 different directions, create large 40mm side feed stitches or even in zigzag without moving the fabric.

One-touch needle position control

Now you can raise and lower the needle at the touch of button. Rotate your fabric freely or use this feature to create detailed stitches in smaller areas.

Circular sewing

Make concentric circles, arcs and more with the circular sewing attachment. In addition, the included braiding and cording feet allow you to embellish your creations with decorative threads and trims for that special finishing touch.

Brighter workspace

The Innov-is 2200 has 5 bright built-in lights that illuminate key areas so you can work with dark fabrics more easily.

Convenient drop-in bobbin

Simply drop in the bobbin and start sewing. The bobbin's transparent cover lets you know when your thread is running low.

Non-stop sewing

Thanks to the 2200 machine being equipped with 2 motors, you can wind a new bobbin as you continue to sew. Your designs will take even less time to finish.

Fast spool changeover with automatic thread cutter

The automatic thread cutter cuts upper and lower threads at the end of each sewing task, so you can quickly start sewing again or change to another project.

Sew any fabric, thick or thin

Automatic thread tension senses the thickness of your fabric for you and instantly adjusts to the most appropriate thread tension. Perfect for difficult fabrics.

Hassle-free reverse and reinforcement stitches

The Innov-is 2200 automatically sews in reverse, zigzag and automatically controls the number of reinforcement stitches, leaving you free to concentrate on the project rather than the stitches.

Difficult fabrics made easy with an adjustable presser foot and 3 clearance levels

Adjust the pressure on the machine's presser foot and you can even sew difficult fabrics or hem thick seams with ease.

Optional extras

Embroidery threads

Large collection of high quality embroidery threads.

Embroidery card library

Hundreds of fantastic patterns to choose from!

Flesh tone threads

Ten subtle shades, perfect for blending into facial tones, are ideal for use with the PHOTO STITCH feature in PE-Design.

Embroidery bobbin threads

Polyester bobbin thread in black and white.

Metallic threads

Fourteen metallic coloured threads made with quality polyester fibre add sparkle to your embroidery projects.

Stabilisers

Iron-on stabiliser and Water soluble stabiliser.
